

HAPPENINGS IN AND ABOUT TOWN

CAR STRIKES VAN; THREE MEN HURT

Pinned Under Wagon Nearly Ten Minutes Before Rescued by Crew.

Three men had a narrow escape from death, Monday night, when a heavily loaded moving van was struck and turned end over end by a speeding north side Missawaka car, near the watch factory.

The injured are:
George Barr, 24 years old, 716 E. Vista, right shoulder, right hip and head badly bruised.

S. W. Bailey, 46 years old, 125 S. St. Louis st., owner of the car, injured internally.

Henry Pluehaff, 36 years old, 228 N. Sycamore st., right leg and arm bruised and face badly cut.

Under Van 10 Minutes.
When the car struck the van it turned the wagon over and pinned the three men and one of the horses under it. The men were underneath the load nearly 10 minutes until the car crew and passengers pulled them out. The horse was caught by the end of the wagon and was held that way for nearly half an hour.

Both the car and van were going east, the van having turned into Missawaka av., from Thrush st. All three men were riding on the seat of the van and claim that they looked but saw no car approaching. The motorman, R. A. Miller, says he could not see beyond the street light on the corner and did not see the van until he was directly on top of it. The car went nearly 50 feet past the van before it could be brought to a stop. Clyde B. Painter was the conductor of the car.

None Seriously Hurt.

Barr says that the dash board was pressing down on his face while he was lying on the ground. Bailey was pinned down by one edge of the wagon which fell across his chest. Pluehaff's face was cut and bruised by stones in the road when he fell.

All of the men were removed to their homes in the police ambulance in charge of Patrolmen Pinter, O'Connell and Miller. The street car company sent Drs. Miller and Dorley to attend the men and the physicians reported that there were no bones broken.

FATHER SHOULD TEACH BOY, SAYS DR. BARKER

Physical Expert Declares All Sex Hygiene Ought to Be Taught at Home.

"A Father's Relation to His Boy" was the subject of the talk that was given by Dr. Chas. E. Barker at the Y. M. C. A. last evening, marking the second day of the "Health and Happiness Week." The meeting was for men only.

Mr. Barker laid stress on the fact that all of the sex hygiene that the boy learns should be taught him by the father of the boy in the home. "Sex hygiene," said Mr. Barker, "should not be taught in the public schools by teachers."

"All of the mistakes that are made by the boy or girl are due to improper information on sex matters, that should have been taught to them in their earlier years by their fathers and mothers."

Dr. Barker in the course of his lecture took an imaginary son, and talked to him at the different stages of his life, saying that he believed should be unfolded to the boy by his father.

The speaker also spoke of the duty of the father of the boy in having the boy obey in the home first of all, for if the boy understands that he must obey at home he will become an obedient citizen when he is grown up.

Dr. Barker is to speak at the Young Women's Christian association at 7:45 o'clock Tuesday evening, to all the women who wish to attend. His subject will be "How a Woman Can Find and Keep Good Health." Mr. Barker was with the Redpath chaletauqua when they visited this city in 1915, and spoke here at that time.

ELBEL'S BAND GIVES THE OPENING CONCERT

Program of Old Time Airs Enjoyed by Big Crowd at the Court House.

Main street between Washington and Jefferson was packed last night while Elbel's band rendered the concert of the centennial celebration, on the platform at the court house. Autos lined the curbs while the court house lawn and sidewalks were crowded.

A program of old time airs interspersed with popular and classic numbers was enjoyed. Additional instruments were added to the band in all these being thirty.

Stage Set For Pageant

The thousands of spectators out for the opening of the pageant tonight will be surprised at the transformation that has taken place at Springbrook park since the Interstate fair. The grandstands have been more than trebled in size, and the race track enclosure has been converted into a vast open-air stage which with its background of a lake, river, trees and shrubbery resembles a park.

An army of more than a hundred workmen have been engaged all this week in preparing the grounds for the great celebration. The fence around the race track has been removed. About eight thousand additional seats have been placed in the grand stand, including two hundred more box seats which have been added to the front of the central span, and the band and pageant directors' platforms have been erected.

A telephone system connecting all parts of the grounds has also been installed.

Further out a large artificial lake deep enough to float canoes has been formed. The lake and the stage itself on which all the scenes of the pageant will be enacted have been enclosed in an oval of trees and bushes which form a very beautiful background.

On the top of the grandstand an enclosure has been placed to protect the special lighting system which has been installed at the cost of \$2,000. Included in this system are half a dozen powerful search lights which will flood the stage with light during the performance. The lighting effects during the pageant, it is declared by all who have seen the system in operation will be wonderful.

Varied lights will play upon the different scenes, and especially in the final chorus are expected to bring out remarkable effects.

A telephone system connecting all parts of the grounds has also been installed.

The Wherefor Of Play To Be Threshed Out

Exactly 272 questions have been sent in by recreation leaders throughout America to be discussed and, if possible, to be solved at the Recreation congress to be held at Grand Rapids, Oct. 2 to 6 inclusive. Those from South Bend who will attend this congress one or two days are Superintendent of Playgrounds F. B. Barnes, L. M. Hammer-schmidt, chairman of the recreation committee, Eugene Manning, Mrs. Homer J. Miller, and Mrs. Clem Smorok. Mr. Barnes is on the program to assist in several of the discussions.

Instead of orations and long addresses, there will be pointed, practical answers to the questions by national experts. Informal discussions will give everyone opportunities to propose additional questions or to contribute actual experiences.

No time is to be wasted in the ancient discussion as to whether playgrounds and recreational activities are needed. That has been settled in a vigorous affirmative by the 422 communities, large and small, which now have supervised recreation. To the practical problems as to how to secure, finance, conduct, and develop playgrounds and other recreational facilities, urban and rural, the entire six days of the Recreation congress will be devoted.

Some of the Questions.
"Neighborhood and Community Centers" are the theme of the first thirty-one questions. Among them are the following:

"What games can young men and young women play together under proper leadership in the recreation centers?" "What is the place of social dancing in a municipal neighborhood center?" "Should attendance upon dances be conditioned upon membership in other groups?" "Should the director of a neighborhood center be a custodian or a leader?" "Should he help the neighborhood to organize itself?" "Should he spend as much time out among the neighbors as he spends within the center?" "How can the neighborhood center plan its work so as to reduce intemperance?" "What plans for community Christmas trees have been found most successful?" "What success have volunteer leaders had with groups of young people?"

Some of the other topics which will be taken up at length are "Group Organization," "Games and Contests," "Rural Recreation," "Physical Efficiency," "Adult Recreation," "Civic Forums," "Keeping the Playgrounds Free of Politics," "Ways and Means," "Budgets," "Dues and Charges" and "A New Profession."

Provides For Three Shifts.
The new scale, which went into effect on the first day of October, provides for three shifts of firemen and engineers. This will make each man's day nine hours long. The firemen will start work at 8:15 p.m. with a maximum wage of \$95. Engineers will be paid \$80 per month when first employed and the maximum salary will be placed at \$100, which is the same salary that they are now receiving.

Because the employees of the water plants are at present taking their vacations and one or two men are absent all the time, Mr. Toyns said that he had decided not to put in force the new time and wage schedule that the board had ordered. As soon as the whole force is again back at work, he said, he would provide for the employment of new men and for the shortening of the hours.

Recommend Teeple Raise.
The committee recommended to the council the passage of an ordinance to raise the salary of assistant building commissioner Teeple to \$1,500 per year. It was recommended by Mayor Keller and by Mr. Morris that Mr. Teeple be retained in the employ of the city, owing to his efficiency and very accurate knowledge of the city's building code.

It was decided to accept the invitation to review the stand at the court house, the civic parade which will take place Tuesday afternoon as a part of the centennial celebration of St. Joseph county.

NIGHT SCHOOL OPENS.
The Y. M. C. A. night school opened last evening with an enrollment of about 60 students. Book-keeping, mathematics, mechanical drawing, business law and English, and the common branches are the subjects that are offered. Each class meets twice a week.

CITY EMPLOYEES' PAY IS BOOSTED

Council Informed That New Scale at Waterworks Started on Oct. 1.

That the ordinance recommending that the board of public works raise the salaries of the employees of the city water plants, he tabled, was the tenor of the advice which the committee of the whole decided, last night, to present at the next meeting of the common council. This was decided after it was learned from the report of Pres't Morris of the board of public works, that a new wage scale has been effective since Oct. 1st.

At the last meeting of the common council, Councilman Seifert said that the declarations of the men employed at the city water plants, regarding their wages, were at variance with the impression left by the report of the board of public works presented at the previous meeting of the committee. The matter was then referred to the meeting held last night and Mr. Morris was asked to submit a new report.

Gives Detailed Report.
When the subject came before the council, Councilman Seifert gave a detailed report of the wage scale now in force among the city's employees in the department. Both engineers and firemen, he said, worked 12 hours or more a day, the firemen receive less than \$80 a month and engineers less than \$100. Metermen receive \$2.50 a day and the men who work on the city streets but 20 cents an hour for nine hours of work. Councilman Thompson substantiated some of these statements.

More than two months ago a new wage scale was adopted by the board of public works according to the report of Mr. Morris. He declared that he was under the impression, when he last addressed the committee of the whole, that this raise and change in the working hours of the men had already been adopted, not knowing that it was being held up by the superintendent of the works, J. Toyns. He maintained that Mr. Toyns is given the authority to use his discretion in the matter of the time of the enforcing of the decrees of the board of works.

Provides For Three Shifts.
The new scale, which went into effect on the first day of October, provides for three shifts of firemen and engineers. This will make each man's day nine hours long. The firemen will start work at 8:15 p.m. with a maximum wage of \$95. Engineers will be paid \$80 per month when first employed and the maximum salary will be placed at \$100, which is the same salary that they are now receiving.

Because the employees of the water plants are at present taking their vacations and one or two men are absent all the time, Mr. Toyns said that he had decided not to put in force the new time and wage schedule that the board had ordered. As soon as the whole force is again back at work, he said, he would provide for the employment of new men and for the shortening of the hours.

Recommend Teeple Raise.

TO OBSERVE FIRE PREVENTION DAY

Mayor Keller Receives Copy of Proclamation to Celebrate Oct. 9.

Centennial Fire Prevention day will be celebrated throughout the state of Indiana on Monday, Oct. 9th, in compliance with the request of the proclamation issued by Gov. Ralston, a copy of which is in the hands of Mayor Fred W. Keller of South Bend.

As a fitting introduction to the matter of the proclamation, mention is made in brief of the meaning of the celebrations that are taking place all over the state in honor of the centennial. Attention is called to the vast amount of the annual losses by fires and especially to the large percentage, 65, of which are caused by carelessness on the part of owners or tenants. In order to correct this deplorable situation in as far as possible Fire Prevention day has been named.

Could Enlist Children.
The document goes on to show some of the means by which this day may be made effective. Among the recommendations are that the social organizations as well as the private owners and tenants take the question of fire prevention up for consideration. Particular attention is called to the possibility of enlisting the assistance of the school children in campaigns against intentional and unintentional exposure to fire risks.

The state of Indiana has originated a method of the study of fire prevention in the schools which has been copied by fire marshes in all parts of the United States. The system involves the requisition from each pupil of an inspection of his own home with a view to discovering all dangerous conditions, which may possibly cause fires.

May Get Survey Here.
Each student makes a written report of his inspection on the blanks which are supplied free by the state fire marshal, and hands it in to the authorities. These reports are tabulated and arranged either by the school authorities or by some association or federation interested in the welfare of the city to give a very complete survey. There is a possibility that a survey of this sort may be made in South Bend in the near future.

SAYS GIRLS NEED \$10
A WEEK TO GET ALONG

Caroline Gleason of Oregon Industrial Commission, Speaks to Notre Dame Students.
To live as girls should rightly live requires a salary of at least \$10 per week, was the statement made by Miss Caroline Gleason, secretary to the Industrial Welfare commission of Oregon, in a talk before the students of Notre Dame university, Monday afternoon. Miss Gleason also spoke at St. Mary's academy.

Even this amount allows only a little for clothes and spending money, according to Miss Gleason, who is an advocate of better conditions for the girls forced to work. Factory girls can get along on a smaller wage than office girls, because of the fact that they do not have to dress so well, she said.

Telephone companies came in for criticism from the speaker, who said that girls replaced the men because they were not so excitable, and stated that many of them become nervous wrecks because they are not only the slave of the public but also of the "boss."

In conclusion, Miss Gleason made a strong plea to the student to do all they could to better the conditions of the working girl. "Do your Christmas shopping early," was one of the slogans used by Miss Gleason.

Notre Dame News

Members of the congregation of Holy Cross throughout the country, have received from Very Rev. Gilbert Francis, C. S. C., of Notre Dame, superior general of the congregation, the announcement that Father Legrand, C. S. C., former vicar general of the diocese of Dacca, India, has been appointed bishop of that see. He succeeds the late Bishop Frederick Linneborn, who died in Dacca, Eastern Bengal, several months ago. Fr. Legrand has been engaged in missionary work in India for a number of years and is well acquainted with the work of his priests and brothers there.

The Day Students association held its first regular meeting yesterday afternoon. Hugo Vadish was elected assistant athletic manager for the ensuing year. Pres't Vernon Helmen, appointed the following committee to make plans for the first social function and to make a report next Monday: Vincent Vaughn, chairman; Paul Fogarty, Melvin Brinkner, Joseph Flynn, Maurice Keady, Holland and Cregan.

The finance committee to look after the funds of the association follows: Leo Berner, chairman; Arthur J. Hunter, Paul Fogarty, and Hugo Vadish. Plans are being made to enter a football team in the interhall contests this year.

Dr. Paxson, dentist, Farmers' Trust.

Wooltex Suit Week

Whoever dreamed there could be such stunning styles

Just the kind and weight to put on these cool fall days.

Every garment in our Suit Week's Display is a new model of this season's approved style.

You will be delighted to see how becoming these new modes are. The fall styles are characterized by large collars, wide cuffs, shirrings, plaits and belts.

Many of the more dressy models are belished with trimmings of fur, on collar, cuffs and hem.

Materials are smart serges, and gabardines, silks and wool velours, chifon broadcloth, striped Bedford cords, handsome velvets and mohair mixed in great variety.

The wanted colors cover a wide range and are strikingly attractive. Russian green, seal brown, navy blue, plum, taupe, rubber-gray, and wine colored Burgundies.

We earnestly invite you to come in and see this display of Wooltex Suits while the opportunity for selecting materials and sizes is best.

Wooltex Suits, \$25.00 to \$50.00.

Robertson Bros. Co.

And When it Comes to Millinery

You Should See What Came Today,

The New Hats: The Spanish Sailor

These smart hats are clever, and suggest the romantic environment of Spain. Made of hatters' plush in black or colors—sailor style with large brim, although we have them also in the smaller brim for those who desire the more subdued. Each are tailored with banded ribbons. Prices \$5.00 to \$10.00.

Also banded velour Hats, ready to wear, at \$3.50 to \$8.95.

New Blouses for Wear With Autumn Suit

New Georgette Crepe Waists in navy, arrived this morning—handsome garments with embroidery and bead trimming, large collars and fancy cuffs. Priced at \$12.50 and \$15.00.

Waists also of crepe de chine and Georgette crepe came by express, dainty and fresh with hand embroidery, large collars, long sleeves, fancy cuffs, large pearl buttons, colors in flesh or white. Price \$6.00 to \$10.00.

DRAMA CLUB INITIATES

Thirty New Members Taken Into High School Society.

At a meeting held in "Our Little Theater" at the high school Monday afternoon, the high school drama club initiated 30 new members. During the process of the initiation, the new members were given a chance to demonstrate their dramatic ability by staging a pantomime.

During the coming season, the club intends to form a "Little Theater" company, which will give public performances on the "Little Theater" stage, at regular intervals during the winter months.

K. OF C. TO OBSERVE COLUMBUS DAY OCT. 18

Members of the Knights of Columbus will celebrate Columbus day, on Oct. 12, with a banquet at the Oliver hotel, according to plans made at a meeting of the lodge at

the K. of C. home, Monday night. Several prominent speakers will be secured for the affair. All members of the order are asked to meet at the home, Tuesday afternoon at 1:30 o'clock to participate in the civic parade. A float will accompany the marchers, which will represent the landing of Columbus.

SOCIALIST CANDIDATE HERE WEDNESDAY NIGHT

George R. Kirkpatrick, Vice Presidential Nominee, to Speak at High School Auditorium.

George R. Kirkpatrick, candidate for vice president on the socialist ticket, will speak at the high school auditorium Wednesday evening.

Kirkpatrick is an anti militarist and is the author of several books against militarism, one of which, "War What For", has been published in its third edition. He will speak

here on the problems of the working class.

INFANTILE PARALYSIS CASE NOT SERIOUS

The condition of Vernette Heidemann, the 11 year old daughter of Geo. H. Heidemann, 1367 Vista av., who was taken ill Saturday with infantile paralysis, is much improved. The child's case was of a mild nature, and her condition is not regarded as being serious.

Florida's highest point is 306 feet above sea level.

Nuxated Iron to make New Age of Beautiful Women and Vigorous Iron Men

Say Well-Known Physicians—Quickly Puts Roses Into the Cheeks of Women and Most Astonishing Youthful Power Into the Veins of Men—It Often Increases the Strength and Endurance of Delicate, Nervous, "Run-down" Folks 200 Per Cent in Two Weeks' Time.

A Wonderful Discovery Which Promises to Mark a New Era in Medical Science.

coloring matter in the blood of my children is, alas! not that kind of iron. You must take iron in a form that can be easily absorbed and assimilated to do you any good, otherwise it may prove worse than useless. Many an athlete and prizefighter has won the day simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the arena; while many another has gone down in inglorious defeat simply for the lack of iron."

Dr. Scholer C. Jacques another New York physician, said: "I have never before given out any medical information or advice for publication as I ordinarily do not believe in it. But in the case of Nuxated Iron I feel I would be tending in my duty not to mention it. I have taken it myself and given it to my patients with most surprising and satisfactory results. And those who wish quickly to increase their strength, power and endurance will find it a most remarkable and wonderfully effective remedy."

NUTRATED-IRON, which is prescribed and recommended above by physicians in such a great variety of cases, is not a patent medicine, nor secret remedy, but one which is well known to druggists and whose iron constituents are widely distributed in the most reliable sources in Europe and America. Unlike the older inorganic iron products, it is easily assimilated, does not irritate the stomach, makes them black, nor upset the stomach, or the contrary. It is most potent remedy in iron, all forms of indigestion as well as for nervous, run-down conditions. The manufacturers have such great confidence in Nuxated Iron that they offer to refund \$100.00 to any charitable institution if they cannot take any man or woman under 60 who lacks iron, and increase their strength 200 per cent or over in four weeks' time, provided they have no serious organic trouble. They also offer to refund your money if it does not at least double your strength and endurance in two days' time. It is dispensed in this city by Wetzel's Cut Rate Drug Store and all good druggists.

PROVIDE PARKING SPACE

Autoists Who Drive a Pageant Will Be Given Protection.

All who so desire may drive to Springbrook park evenings, to witness the historical pageant as sufficient parking space and protection will be provided at the park for all machines. Parking space for more than 1,000 machines each night has been arranged in the ball park and in the vacant lot across the road from the park proper. J. C. Ellisworth, chairman of the committee which has charge of providing parking spaces for the cars, has secured five men to look after the cars. Electric lights have been strung over the grounds and every arrangement made to handle a large number of cars with facility and ease.
